Aryan Trivedi

Full Stack Engineer | React.js | Next.js | Node.js | TypeScript

+91-7302336989 | aryantrivedi208@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Engineer with 3 years of professional experience building applications with React, Next.js, Node.js, and TypeScript. Built AppSecAuth from inception, led 6–8 engineers, and delivered authentication capabilities across 10+ enterprise client deployments. Hands-on experience spans identity architecture, microservice security, and complex frontend and backend workflows.

Professional Experience

Techolution Inc. Jan 2024 – Jul 2026

Full Stack Developer | Project Lead, AppSecAuth *Hyderabad, India*

- Built AppSecAuth from inception and led delivery across **10+ enterprise client deployments**; reusable authentication, SSO, and configurable RBAC reduced authentication development time by **90%** and implementation costs by **80%**.
- Led **6–8 engineers** across frontend, backend, and AI while contributing hands-on code; drove architecture, code reviews, sprint and release planning, technical interviews, and client solution discussions.
- Designed and implemented **multi-tenant identity architecture** for one enterprise client, isolating authentication and authorization through organization-specific identity-provider configurations, scoped RBAC, and tenant-aware database access.
- Standardized **timestamp-based HMAC request signing and verification** across microservices, providing consistent service authentication and request-integrity checks.
- Integrated Okta, Azure AD, and Google through OAuth 2.0, OpenID Connect (OIDC), SAML, and NextAuth.js to support enterprise authentication and SSO flows.
- Owned the frontend of an AI document-extraction product: synchronized PDF canvas annotations with suggested fields, used **coordinate-aware matching** to align user-drawn selections with AI-detected elements, and supported custom extraction schemas.
- Developed an enterprise authentication proof of concept that contributed to securing **subsequent client engagements**.

Atticus AI Jul 2023 – Nov 2023

Frontend Developer Intern *Remote*

- Built the React and TypeScript web application frontend for an early-stage legal technology startup, supporting AI-assisted document workflows for lawyers.
- Proposed a **Microsoft Word add-in** to bring AI-assisted workflows into lawyers' document-editing environment; independently built its React and TypeScript frontend.

Technical Skills

Languages & Web: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, TanStack Query, Tailwind CSS, SCSS, Material UI

Backend: Node.js, Express.js, REST APIs, WebSockets, Zod

Security: JWT, OAuth 2.0, OIDC, SAML, RBAC, HMAC

Data & Cloud: MongoDB, PostgreSQL, MySQL, Redis, Docker, GCP, Azure

Tools & Testing: Git, GitHub, pnpm, Vitest, Claude Code, OpenAI Codex

Projects

MacroIntel | Macroeconomic Research & Trading Analytics Live Project

Next.js, TypeScript, Express.js, MongoDB, Python, MT5, GCP

- Built and deployed a macroeconomic research platform that ingests FRED histories and release calendars into MongoDB, with JWT-authenticated watchlists tracking new and revised observations per user.
- Engineered a **Python MT5 connector** for a live demo account; grouped broker deals by position to reconstruct completed trades, powering filterable, paginated history, account metrics, and daily/cumulative P&L charts.

Education

Kalinga Institute of Industrial Technology (KIIT) 2019 – 2023

B.Tech, Computer Science & Engineering CGPA: 8.5/10
